Old Looks?

(BY DR. L. H. SMITH).

Persons suffering from too much urle

Persons suffering from too much uric acid in the system frequently look older than they should. They age faster and the appearance of gray hair or baildhead in early years is, indeed, often a sign of uric acid. The face appears lean and hargard, lines and wrinkles appearing in young men or women.

The best way to combat this premature age and the obstruction to the arteries and family circulation is of the simplest: Drink coplously of pure water between meals. This will not make you fat, as it is only the water taken with the meals that fattens. Obtain at any dryg store a package of Amuric, double strength, which is to be taken before meals, in order to expel the uric acid from the system. The painful effects of backache, lumbago, rheumatism, gout, due to uric acid in the blood should quickly disappear after treatment with Anuric
